SUMMARY

Backend and DevOps-leaning fullstack engineer who ships production systems — real-time engines, secure APIs, CI/CD and containers. Computer engineering student working across the stack, from a live auction platform to Kubernetes resilience tooling.

EXPERIENCE

Founder & Lead Developer *Okut Gitsin — okutgitsin.com | Nov 2025 – Present*

- Designed and built a live-stream vehicle auction platform end to end, from data model to deployment
- Engineered an atomic bid engine on Redis and Lua for millisecond-level, race-free bidding
- Built real-time bidding over WebSocket and live video auctions with LiveKit
- Added an escrow payment flow (held / refunded / forfeited) with IBAN verification, Helmet CSP/HSTS, rate limiting and GitHub Actions CI/CD

DevOps & Backend Developer *Extramus | Jul 2025 – Sep 2025*

- Built HR-management backend components and document-management infrastructure
- Implemented secure file-upload mechanisms with role-based access control (RBAC)
- Automated testing and deployment with GitHub Actions CI/CD pipelines
- Containerized backend services with Docker for consistent environments
- Worked with Node.js, TypeScript and PostgreSQL in production-ready systems

R&D Engineering Intern *Telenity (R&D) | Jun 2024 – Aug 2024*

- Developed backend modules with Spring Boot
- Worked with Java, MongoDB, Kafka and SQL-based systems
- Focused on bug fixing, performance optimization and system stability
- Contributed to secure backend service development

VOLUNTEERING EXPERIENCE

Educator & Co-leader *Anticverse Tech | 2022 – 2023*

- Helped manage the cybersecurity team and delivered training on data and web security
- Led several projects and coordinated teamwork

Team Leader & Design Engineer *Teknofest – Ouroboros Team | 2021 – 2022*

- Led the drone design and development process
- Managed technical coordination within the team

EDUCATION

B.Sc. Computer Engineering Konya Food and Agriculture University | 2022 – 2026

PROJECTS

Reveil — AI-Assisted Self-Management Platform *Ongoing*

- Authentication, behavior tracking and AI-assisted features via prompt-based workflows over a NestJS + FastAPI backend. — React Native, NestJS, FastAPI, PostgreSQL, OpenAI API

Costsight — Cloud-Cost Anomaly Detection

- Anomaly detection on AWS CUR data using STL, Isolation Forest and Z-Score detectors, with severity-banded alerts and a Streamlit dashboard. — Python, scikit-learn, Streamlit, AWS

Algorithm Analyzer *01.2026*

- Sorting-algorithm benchmarking tool (Quick, Heap, Shell, Merge, Radix) with performance and memory visualization. — Spring Boot, Java, React, Vite

Open-Source Collaborations

- Contributed test suites and CI to Go, Rust, C++ and ML repositories, including k8s-resilience-harness, femheat, gochain and rust-url-shortener.

TECHNICAL SKILLS

Programming Languages: Java • Python • JavaScript • TypeScript • SQL • Verilog

Frontend: Next.js • React • Vue.js • Tailwind CSS

Backend: Node.js • Express.js • NestJS • Spring Boot • REST APIs

Security & Realtime: OWASP • Wireshark • Burp Suite • WebSocket • LiveKit

Databases: PostgreSQL • MongoDB • MySQL • Redis • Prisma

DevOps & Tools: Docker • GitHub Actions • Kafka • Linux • Postman

Cloud & AI: AWS • AWS ML Foundations • OpenAI API • FastAPI

Languages: English – C1 • Spanish – A1 • Turkish – Native
